

EurikaCoat 3644N

EurikaCoat 3644N is a water based dispersion of an ethylene copolymer, with improved adhesion properties to metallic and cellulosic substrates, including paper, foil, aluminium, fibers, metal, glass and nonwovens, but also to more difficult substrates such as polypropylene.

It can also be used as primer for digital printing applications.

Typical properties

Appearance	Translucent Liquid
Solids Type	Ethylene Copolymer
% Solids	27,5 – 29,5
Viscosity (Brookfield, #2 @60 RPM)	< 800 mPas
pH	7,0 – 9,0
Emulsifier Package	Ammonia
