

# EurikaCoat 3640N

**EURIKACOAT 3640N** is a water based dispersion of an ethylene copolymer, with more enhanced adhesion properties to metallic and cellulosic substrates, including paper, foil, aluminium, fibers, metal, glass and nonwovens, including more difficult substrates such as polypropylene.

## Typical properties

Appearance	Translucent White Liquid
Solids Type	Ethylene Copolymer
% Solids	27,5 – 29,5
Viscosity (Brookfield, #2 @60 RPM)	< 800 mPas
pH	7,0 – 9,0
Emulsifier Package	Ammonia
