

EurikaCoat 8520

EurikaCoat 8520 is a general coating with an excellent water, oil and grease barrier, in combination with very good heat sealability, while also still cold set gluable.

It acts as a ready to use formulated coating for paper and board, which can be applied by either gravure or flexo. Its low film forming temperature brings excellent anti-blocking properties (MFT = 6°C).

Typical properties

Appearance	Milky White liquid
Solids Type	Acrylic Styrene Copolymer
Non-volatile Content, %	46 - 48
pH	8,0 – 8,8
Viscosity (Brookfield, #3 @20 RPM)	250-700
Density	1,05
