

EurikaCoat 9455

EurikaCoat 9455 is a fully recyclable water-based coating based on vegetable waxes which provides specific barrier properties, such as a very low MVTR, very good OGR and very low Cobb values. It is specially designed for environmentally friendly fibre-based packagings and wraps. In addition, it also offers excellent release properties.

It is recommended as a perfect alternative to paraffin based coatings, increasing tremendously the sustainability of all food and other packaging systems.

Typical properties

Appearance	White Liquid
Solids Type	Vegetable wax / Polymer
% Solids	40 – 42
Viscosity (Brookfield, #3 @60 RPM)	< 500 mPas
pH	8,0 – 10,0
