

# MWE 924

**MWE 924** is a waterbased emulsion of montan wax, used to improve performance and processing in a number of various industries, combined with enhanced surface properties.

When used as an additive, MWE 924 will improve slip and anti-blocking properties in various coatings for packaging films, metal surfaces, wood and leather.

## Typical properties

Appearance	White Liquid
Solids Type	Montan wax
% Solids	29 – 31
Viscosity (Brookfield, #3 @60 RPM)	< 100 mPas
pH	5,0 – 7,0
